About Us

NMG

Nmore Group is a privately-owned tech company that was founded in 2016 with the scope of delivering individualized Information Technology strategy, design and implementation.

By 2020 the company expanded its products and services to provide website and application development, alongside a comprehensive range of managed IT services.

Since inception, Nmore Group has served more than 170 EMEA SMEs and MNEs, in practically every major industry, making us the preferred choice of dozens of organizations.

In 2016 we set out to improve the working potential of our clients. By 2021 we managed to realize the first stage of this vision and are now focusing on expanding internationally by end of 2023.

Nmore Group is an IT company specialized in turnkey business solutions, and as such offers a range of integrated digital services.

The list on the right by no means reflects the full list of services, rather the most popular in-demand:

Case Studies

MONJASA

Goal

Outline the IT infrastructure strategy of the business; audit, configure and modify new and existing enterprise systems, software and hardware; and outsource corporate IT support.

Solution

- Identified and documented all IT infrastructure;
- Audited, configured and modified IT systems;
- Fixed IT software and hardware bottlenecks;
- Procured, replaced and repurposed hardware;
- Provide monthly maintenance and IT support;

Results

Following the initial audit and configuration, no further issues have been identified, as we continue to provide managed IT services and support to Monjasa.

HYCM

Solution

- Complete comprehensive design and development of the website according to customer requirements on Drupal CMS.
- All the code was transferred under customer management, as required by the regulation.
- Complete optimization of design for mobile devices and optimization of the site loading speed.
- Delivery of specific computer and server equipment.

Website

Case Studies. Development

C-core

Solution

- Complete complex development of the website and user platform with unique design and functionality.
- Due to the client's lack of an internal IT department, we provided a full range of support, hosting and security of the system, as well as carried out modifications on request.
- For this project we have conducted numerous consultations on architecture, logic and design of the system which is oriented to institutional-level clients.
